

## SUPERINTENDENT

### Company

Barge Master is a fast growing company in the offshore wind industry. We are innovative company that develops motion compensation solutions, such as platforms, cranes and gangways for the maritime and offshore industry. Our systems increase safety and workability and reduce the costs of offshore work. Barge Master develops different systems that can be adjusted to the client's needs. Barge Master deploys its systems worldwide. Typical customers are energy companies, offshore contractors, maritime service providers, dredging companies and salvage companies. Barge Master's head office is located in Rotterdam.

Barge Master will contribute in the coming decade to the construction of offshore wind farms, amongst others, of the coast of the USA with an innovative solution: the BM Feeder. For this motion compensated feeder solution we will launch a new building program. Watch a movie of the solution <https://youtu.be/yZHY9XLVioE>

### The function

The mission of the SuperIntendent is to manage all the maintenance, repair and modifications of the equipment efficiently and sustainably. To provide the best technical service and support to the company on and offshore and to stay ahead of the development of new techniques, changing rules and regulations and client wishes. - Further development and execution of a spare part management system;
- Further development and execution of preventive maintenance system;
- Internal reporting (technical status reports of equipment, monthly reporting, technical budget);
- Technical focal point to both internal and external stakeholders;
- Compliance to Industry standards and practices including SHEQ requirements

**Profile:**

- Medior/senior; 5-10 year working experience as a technical superintendent, technical manager, or senior maintenance engineer in wind/offshore or affiliated industries;
- Experience in leading technical teams;
- Experience in maintaining and operating complex, mission critical equipment;
- Used to working in a 24/7 organization which requires short and fast response times;
- Knowledge of wind/offshore industry standards and practices;
- Ability to travel (limited) in case of technical issues;
- Knowledge off/experience with motion compensation, mechatronics, hydraulics, electrical engineering or any of the before mentioned is a pre.

**WORKING AT BARGE MASTER**

At Barge Master we work hard to deliver quality and finish our projects in time. We believe a stimulative company culture with enough room for fun motivates our people to do so. Our company is growing, and we want you to grow with it. That is why working at Barge Master also means:

- Working in the exciting offshore wind industry that contributes to the energy transition;
- An open, young and supportive working environment;
- A remuneration that reflects the responsibilities;
- Operating in a team but with large individual powers;
- A healthy and sustainable lunch, including a salad bar;
- Many company gatherings;
