Our priority is and remains the well-being of our employees and (sub)contractors by creating a safe, healthy and ecofriendly work environment that we maintain and improve by the quality system. Each employee is timely informed, instructed and trained as needed in order to execute his/her tasks.

All subcontractors and suppliers' activities are professionally coordinated, and the employees are fully integrated in our project organization. The quality of the internal processes and of our management system is systematically evaluated and stored, and continuously reviewed in function of improvement.

Understanding our client's needs is the starting point for everything we do. We maintain relationships by working closely together with clients and deliver on their requirements. We strive to achieve results safely, on time and within budget, thereby meeting or exceeding client and regulatory requirements.

We believe that our people make the difference and we recognize the immense strength of teamwork. We trust each other and promote open, constructive debate and feedback. Unless confidential, information is shared transparently, both internally and externally. From this point of view Barge Master wants to do business with suppliers who act with responsibility and integrity.

Both workers and employers have the right to set up, join and run their own organizations without interference from the State or any other entity. All, including employers, have the right to freedom of expression and opinion, including on the topic of unions – provided that the exercise of this right does not infringe a worker's right to freedom of association.
